

Description of Situation	Force Present (P) or Absent (A)?	Explanation
 <p>1. A block hangs <u>at rest</u> from the ceiling by a piece of rope. Consider the forces acting on the block.</p> <p style="color: red; font-size: 1.5em;">AM</p>	<p>Gravity <u>P</u> or A?</p> <p>Spring: P or <u>A</u>?</p> <p>Tension <u>P</u> or A?</p> <p>Normal: P or <u>A</u>?</p> <p>Friction P or <u>A</u>?</p> <p>Air Res.: P or <u>A</u>?</p>	<p style="color: red;">has mass / on Earth</p> <hr/> <hr/> <p style="color: red;">rope</p> <hr/> <hr/> <hr/> <hr/> <hr/> <hr/>
 <p style="color: red; font-size: 1.5em;">AJ</p> <p>2. A block hangs from the ceiling by a spring. Consider the forces acting on the block when it is at rest (at its equilibrium position).</p>	<p>Gravity <u>P</u> or A?</p> <p>Spring: <u>P</u> or A?</p> <p>Tension P or <u>A</u>?</p> <p>Normal: P or <u>A</u>?</p> <p>Friction P or <u>A</u>?</p> <p>Air Res.: P or <u>A</u>?</p>	<p style="color: red;">has mass / on Earth</p> <hr/> <p style="color: red;">Spring present</p> <hr/> <hr/> <hr/> <hr/> <hr/> <hr/>

Description of Situation	Force Present (P) or Absent (A)?	Explanation
 <p>3. A ball is shot into the air with a spring-loaded cannon. Consider the forces acting on the ball while it is <u>in the air</u>.</p> <p style="text-align: center;">JJ</p>	Gravity: <input checked="" type="radio"/> P or A? Spring: P or A? Tension: P or A? Normal: P or A? Friction: P or A? Air Res.: <input checked="" type="radio"/> P or A?	<p><u>mass / on Earth</u></p> <hr/> <hr/> <hr/> <hr/> <hr/> <hr/> <hr/> <hr/> <hr/> <hr/> <p><u>in air / moving</u></p> <hr/> <hr/> <hr/> <hr/> <hr/> <hr/> <hr/> <hr/> <hr/> <hr/>
 <p>4. A skydiver (who hasn't opened his parachute yet) falls <u>at terminal velocity</u>. Consider the forces acting on the <u>skydiver</u>.</p>	Gravity: <input checked="" type="radio"/> P or A? Spring: P or A? Tension: P or A? Normal: P or A? Friction: P or A? Air Res.: <input checked="" type="radio"/> P or A?	<hr/> <hr/> <hr/> <hr/> <hr/> <hr/> <hr/> <hr/> <hr/> <hr/> <p><u>in air / moving</u></p> <hr/> <hr/> <hr/> <hr/> <hr/> <hr/> <hr/> <hr/> <hr/> <hr/>

Description of Situation	Force Present (P) or Absent (A)?	Explanation
 <p>5. A block rests on top of a table. Consider only the forces acting upon the block.</p> <p style="text-align: right;">KA</p>	Gravity: P or A? Spring: P or A? Tension: P or A? Normal: P or A? Friction: P or A? Air Res.: P or A?	<p>mass / on Earth</p> <hr/> <hr/> <hr/> <p>surface</p> <hr/> <hr/> <hr/>
 <p>6. A block is being pushed across the top of a table. Consider only the forces acting upon the block.</p> <p style="text-align: right;">js</p>	Gravity: P or A? Spring: P or A? Tension: P or A? Normal: P or A? Friction: P or A? Air Res.: P or A?	<p>mass / on Earth</p> <hr/> <hr/> <hr/> <p>Surface</p> <hr/> <p>on surface / moving</p> <hr/> <p>moving</p> <hr/>

Description of Situation	Force Present (P) or Absent (A)?	Explanation
 <p>7. A block slides across the top of a table. Consider only the forces acting upon the block.</p> <p>CB</p>	<p>Gravity: P or A?</p> <p>Spring: P or A?</p> <p>Tension: P or A?</p> <p>Normal: P or A?</p> <p>Friction: P or A?</p> <p>Air Res.: P or A?</p>	<p>mass / on Earth</p> <p>surface</p> <p>surface (opposes motion) moving</p> <p>moving</p>
 <p>8. The driver of a car has her foot on the gas pedal. The wheels are turning as the car accelerates down the road. Consider only the forces acting upon the car.</p> <p>CS</p>	<p>Gravity: P or A?</p> <p>Spring: P or A?</p> <p>Tension: P or A?</p> <p>Normal: P or A?</p> <p>Friction: P or A?</p> <p>Air Res.: P or A?</p>	<p>mass / on Earth</p> <p>surface</p> <p>surface / moving (opposes motion)</p> <p>moving</p>

Description of Situation	Force Present (P) or Absent (A)?	Explanation
 <p>9. A person is sitting on a sled and gliding across loosely packed snow along a horizontal surface. Consider only the forces acting on the person.</p> <p style="text-align: right; color: red;">HS</p>	<p>Gravity: <input checked="" type="radio"/> P or <input type="radio"/> A?</p> <p>Spring: <input type="radio"/> P or <input checked="" type="radio"/> A?</p> <p>Tension: <input type="radio"/> P or <input checked="" type="radio"/> A?</p> <p>Normal: <input checked="" type="radio"/> P or <input type="radio"/> A?</p> <p>Friction: <input checked="" type="radio"/> P or <input type="radio"/> A?</p> <p>Air Res.: <input checked="" type="radio"/> P or <input type="radio"/> A?</p>	<p><i>mass / on Earth</i></p> <hr/> <hr/> <hr/> <p><i>surface (sled)</i></p> <hr/> <p><i>between person and sled</i></p> <hr/> <p><i>moving</i></p> <hr/>
 <p>10. The wheels of a car are locked as it skids to a stop while moving across a level highway. Consider only the forces acting on the car.</p> <p style="text-align: right; color: red;">JM</p>	<p>Gravity: <input checked="" type="radio"/> P or <input type="radio"/> A?</p> <p>Spring: <input type="radio"/> P or <input checked="" type="radio"/> A?</p> <p>Tension: <input type="radio"/> P or <input checked="" type="radio"/> A?</p> <p>Normal: <input checked="" type="radio"/> P or <input type="radio"/> A?</p> <p>Friction: <input checked="" type="radio"/> P or <input type="radio"/> A?</p> <p>Air Res.: <input checked="" type="radio"/> P or <input type="radio"/> A?</p>	<hr/> <hr/> <hr/> <hr/> <hr/> <hr/> <hr/> <hr/>

Description of Situation	Force Present (P) or Absent (A)?	Explanation
 <p>11. A bucket of water, attached by a rope, is being pulled out of a well. Consider only the forces acting on the bucket.</p> <p><i>E.H</i></p>	Gravity: <u>P</u> or A?	<u>mass</u>
	Spring: P or <u>A</u> ?	
	Tension: <u>P</u> or A?	<u>rope</u>
	Normal: P or <u>A</u> ?	
	Friction: P or A?	
	Air Res.: <u>P</u> or A?	<u>moving</u>

- The standard metric unit for mass is kg and the standard metric unit for weight is N.
- An object's mass refers to d and an object's weight refers to b. Fill in each blank.
 - the amount of space it takes up
 - the force of gravitational attraction to Earth
 - how dense an object is
 - the amount of stuff present in the object
- Complete the following table showing the relationship between mass and weight.

Object	Mass	Approx. Weight
Melon	1 kg	$W = mg = (1)(9.8) = 9.8 \approx 10 \text{ N}$
Apple	$m = \frac{W}{g} = \frac{1.0}{9.8} = .102 \approx .10 \text{ kg}$	$\sim 1.0 \text{ N}$
Pat Eatladee	25 kg	$W = mg = (25)(9.8) = 245 \approx 250 \text{ N}$

4. Different masses are hung on a spring scale calibrated in Newtons.

The force exerted by gravity on 1 kg = ~10 N.

The force exerted by gravity on 5 kg = ~ 50 N.

The force exerted by gravity on 70 kg = ~ 700 N.

5. The value of g in the British system is 32 ft/sec^2 . The unit of force is pounds. The unit of mass is the slug. Use your weight in pounds to calculate your mass in units of slugs. PSYW

$$g = 32 \text{ ft/s}^2$$

$$W = 150 \text{ lb}$$

$$\frac{W}{g} = \frac{mg}{g}$$

$$m = \frac{W}{g} = \frac{(150 \text{ lb})}{32 \text{ ft/s}^2} = 4.6875$$

4.7 slugs

6. You might be wondering about your metric weight. Using conversion factors, convert your weight in pounds to units of N. (Use $1 \text{ N} = 0.22 \text{ pounds}$) PSYW

$$W = F_g = 150 \text{ lb}$$

$$\frac{150 \text{ lb}}{0.22 \text{ lb}} = \frac{1 \text{ N}}{0.22 \text{ lb}} = 681.81 \text{ N}$$
$$\underline{680 \text{ N}}$$

7. What is the mass and weight of a 10-kg object on earth?

Mass = 10 kg

Weight = ~100 N (98 N)

What is the mass and weight of a 10-kg object on the moon where the force of gravity is 1/6-th that of the Earth's?

Mass = 10 kg

Weight = 16.7 ≈ 17 N

8. Conclusion: The mass of an object is independent of the object's location in space.

a. A physics book rests upon a level table.

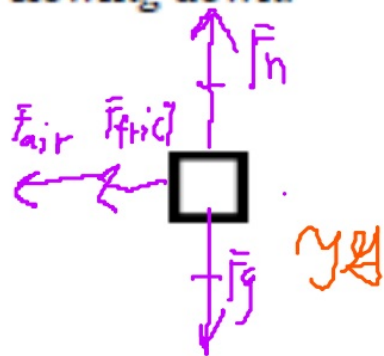

b. A skydiver is falling and has reached a terminal velocity.

c. A large crate is being pushed leftward at a constant velocity.

d. A sledder has reached the bottom of a hill and is coasting rightward while slowing down.

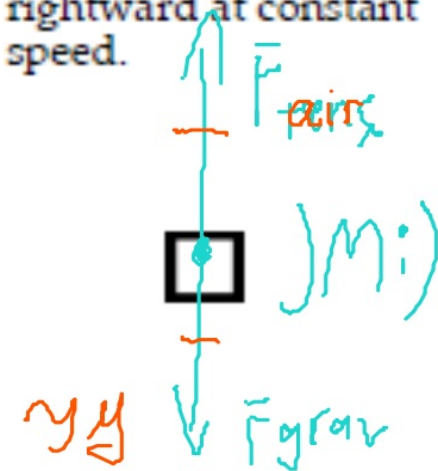

BS

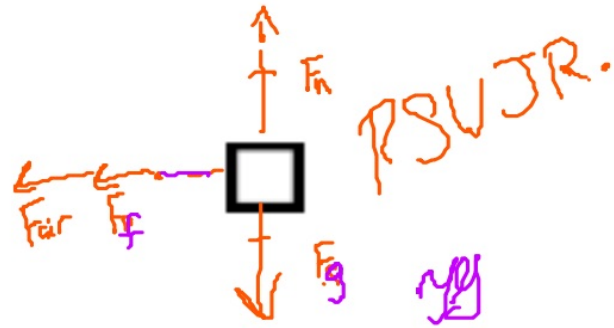

e. A ball is moving upwards towards its peak. Ignore air resistance.

f. An air track glider moves rightward at constant speed.

g. The brakes are applied to a rightward moving car and it skids to a stop.

h. A spider is slowly descending a thin silk thread at constant speed.

i. A projectile is moving upwards and rightwards towards the peak of its trajectory.

j. An elevator is rising at a constant velocity; it is not touching the elevator shaft.

k. An upward rising elevator is slowing down; it is not touching the elevator shaft.

l. A force is applied to accelerate a crate across a rough horizontal surface.
